Supplier evaluation 2022

Dear Sir or Madam,

In 2022 we carried out a supplier assessment in which your company was evaluated regarding the four main factors of price, quality, delivery reliability and services. Relevant documents were taken into consideration in the assessment. This assessment is a complete view including all Greiner Perfoam locations.

The criterion Price evaluates the price performance of your company compared to the market price of the product ordered as well as your willingness to implement the savings requested.

The score for Quality evaluates the quality of the product as well as the quality of the delivery documents and is oriented on the number of complaints made as well as on results of audits.

Delivery reliability is calculated automatically. Also included in this evaluation are any deviations in quantities delivered or deliveries before time.

The value for Service is calculated on flexibility in the case of changes to delivery dates and an assessment of the intensity and competency of any assistance you give.

Also included in the supplier evaluation are relevant documents such as Quality Assurance Agreement, Initial Sample Test Reports, ppm Agreement, Product Safety Officer, general certificates (IATF 16 949, ISO 9 001, ISO 14 001, ISO 45 001, ISO 27 001, TISAX, ISO 50 001). Only documents you have provided to us unsolicited respectively those you have signed with us can be taken into consideration.

The result for your company can be found on the following page.

The maximum score is 100.

NEVEON

The Future of Foam

Evaluation criteria	Score	Weighting
Price	90	20 %
Quality	90	40 %
Delivery reliability	90	20 %
Service	100	20 %

Evaluation of documents

Score required documents	6	von 6
Score certificates	6	von 7

Total score: **91**

With this score you are rated as **A – Supplier**.

We thank you for the good cooperation.

Yours faithfully,

Markus Engelen

Director Supply Chain Management
